

Federal Party SA

FPSA is a new political party, against imperialism, the common enemy of most peoples, because imperialism does not respect others' self-determination. All languages have Left (liberal, multicultural) and Right (conservative, uni-cultural) sides. Currently, the Democratic Imperialist system favors only the Left or only the Right at a time. Before 1994, black & white Right imperialism was the problem. Currently black & white Left imperialism is the problem. The Left and the Right have different functions. If both are not considered, in a balanced way, a system does not function effectively for its peoples. The Left control mostly media, marketing, importing, selling etc. in the urban areas. The Right control mostly manufacturing, farming, food production, security etc. in rural areas. A well functioning democracy will assure the dignity of the Left in multilingual, mostly urban areas and the Right in uni-lingual mostly rural areas. Switzerland countered imperialism like that.

Real self-determination implies decentralizing governance maximally, with the smallest possible cabinet, whilst respecting the Constitution of SA. Then, money use will also be decentralized and benefits for the Left and Right will realize.

The most important function of central governance is defending the whole SA nation, with one effective Federal Defence/Police Force, against imperialist foreigners and SA citizens, allying themselves with the imperialist foreigners, against fellow citizens. Such a defence must be based on a set of universal laws, all SA groups agree to, as applicable to the whole SA. Drugs, for example, is relevant. Reference can be made to the Opium Wars of China, to comprehend why one Federal Defence/Police Force must function, against foreigners who want to dominate imperialistically.

FPSA must be funded by voters, because imperialist foreign large corporations, supporting central governance, do not fund real self-determination politics in SA. FPSA needs councillors in as many as possible wards and municipalities for the local elections of 2021.

The proposal in FPSA is to arrange self-determination for the Left and the Right of each language in multilingual, mostly urban, and uni-lingual, mostly rural areas.
